

The Present Was Never Inevitable

Innovation is not
looking *ahead*.

Innovation is looking *again*.

Innovation is not *disruption*.

Innovation is changing
what gets to *continue*.

Innovation is
not a *moonshot*.

Innovation is *gravity*
understood differently.

Innovation is not a
single *breakthrough*.

Innovation is a field
of *relations* shifting.

Innovation is not
adding *technology*.

Innovation is changing
the terms of *participation*.

The present was *built*.
So it can be *rebuilt*.
